BASIS Warehouse Management & Inventory System

_____

Product Description

BASIS is a complete inventory management solution designed for iOS and Windows mobile devices. BASIS integrates quickly and seamlessly with your existing business system, and is simple to use. From label printing to full barcode scanning support, BASIS has everything that could be needed in a warehouse management application, at a competitive price.

BASIS is a feature-rich warehouse and inventory management system that can be customized to your unique needs. Take a look at the many benefits the BASIS has to offer.

EASY TO USE
BASIS is the warehouse inventory management software that is extremely user friendly and requires only a basic training session for your staff to utilize it.

INCREASES EFFICIENCIES IN YOUR INVENTORY MANAGEMENT
The high-accuracy scanning component of our software's inventory system means less inventory loss while ensuring all inventory is kept up-to-date.

INCREASED SPEED OF WAREHOUSE OPERATIONS
Enhanced productivity means work gets done faster without compromising quality, while also improving overall customer satisfaction.

IMPROVES PRODUCTIVITY OF THE WAREHOUSE STAFF
Workers' jobs are made easier because they have the tools to complete their duties with more speed and precision, while keeping personnel costs low.

INTEGRATES WITH SEVERAL BACK-OFFICE ACCOUNTING SYSTEMS
Retrofits seamlessly with several back-office accounting systems without interrupting business operations whatsoever.

Company Profile

Barcodeapps, specializes in developing applications that deliver process improvement to help improve business processes and increase efficiencies for small to medium sized businesses in manufacturing, distribution, and retail.

We develop software applications for sales order management, and warehouse management focused on inventory control. Both of our primary solutions include barcoding as a main feature.

KEY FEATURES

• Desktop or web interfaces

• Uses familiar inexpensive devices or legacy PDA type terminals

• Scalable and sold as a service with no long term contract

• Reduce inventory count time and mistakes (Full or cycle) by more than 50%

• Full location (bin) tracking module with live inventory counts by location on multiple warehouses

• Manages all aspects of inventory movements (ship / receive / count / track)

PRODUCT COMPATIBILITY

AccountMate SQL version 9.2
