AccountMate Accounting Software Adds over Three Dozen New Features and Capabilities in Latest Upgrade

Some new capabilities support paperless processes

May 16, 2016 08:00 AM Pacific Daylight Time

PETALUMA, Calif.--(BUSINESS WIRE)--AccountMate Software Corporation has announced the latest version upgrade of AccountMate 9 for LAN. This is yet another upgrade to the AccountMate LAN source code modifiable accounting software system. Originally first introduced in 1995, this AccountMate LAN product line continues to provide flexibility for customers to have the accounting software comply with the way they run their business and is scalable as their business grows.

The depth of the feature-set and the type of enhancements made to the AccountMate LAN system continues to serve the mid-market clients and to garner the loyalty of existing AccountMate clients. Most of the enhancements to this version release came as a result of prioritization by AccountMate Solution Providers and their clients.

Many enhancements have been made to this latest release of AccountMate 9.1 for LAN. Some of those include:

- Capability to enter or input data for Forms 1094 and 1095 (Affordable Care Act)
- Option to limit the number of paid leave hours for an accrual year
- Track paid leave using an anniversary or fiscal accrual year
- New time card data converter function
- Ability to void checks by batch
- New accrual year-end closing function
- Option to freeze active or inactive items only
- Ability to change the warehouse after the SO# has been entered when recording SO shipments and advanced billings

AccountMate is proud to offer the type of business accounting software that continues to appeal to the mid-market.

About AccountMate
Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously.
