

## AccountMate Accounting Software Adds New Features and Capabilities in Latest Update

### Viewing, Warning, and Validating Customer Purchase Information Provides Important Double-Checks to Users of its System

(Petaluma) (March 29, 2017) AccountMate Software Corporation has announced the latest update of their AccountMate 9 for LAN product suite. This is another enhancement offering to the AccountMate LAN source code modifiable accounting software system. Originally first introduced in 1995, this AccountMate LAN product line continues to provide flexibility for customers to have the accounting software comply with the way they run their business and is scalable as their business grows.

David Dierke, President and CEO of AccountMate, made the announcement saying that “AccountMate is proud to offer the type of business accounting software that continues to appeal to the mid-market.”

The functionality and feature enhancements made to this latest AccountMate 9.2 for LAN system definitely addresses the needs and desires of mid-market prospects and clients.

Many enhancements have been made to this latest release of AccountMate 9.1 for LAN. Some of those include:

- Ability to Void AP Checks by Batch
- Option to Display NotePad Entries when Recording Vendor Transactions
- Warn the User when Duplicate Customer PO Number is Provided
- Option to turn off validation of Customer PO Number when recording customer transactions
- Allow user to enter Customer PO Number during Sales Quote Approval
- Ability to View Customer PO Number Information in Customer-Related Detail Analysis
- Refine the Methods for Sorting Receipts in the Record Bank Deposit

Most of the enhancements to this version release came as a result of prioritization by AccountMate Solution Providers and their clients.

### About AccountMate

Founded in 1984, AccountMate develops and markets fully modifiable business accounting software. Systems range from single user versions to those that support hundreds of users simultaneously.
