

AccountMate Provides End-to-End Secured Payment Processing Solutions for Clients With Accelerated Payment X-Charge Integration

PETALUMA, CA, Nov 09, 2011 (MARKETWIRE via COMTEX) -- AccountMate Software Corporation recently announced that their ERP software now integrates with Accelerated Payment Technologies' X-Charge payment processing services to provide automated credit card processing. Roy Banks, CEO of Accelerated Payment Technologies, developer of X-Charge, said, "As a leader in the integrated payment processing space, we make it our goal to seek partners who provide top-quality business solution software. Our partnership with AccountMate adds integrated payments to their superior business management and accounting system, providing enhanced convenience and efficiency for their customers."

X-Charge Payment Processing for AccountMate is a comprehensive set of security solutions designed for small to mid-size businesses. Integrating seamlessly with AccountMate, X-Charge payment processing solutions meet or exceed PCI DSS industry security regulations and help integrate credit, debit, check and gift card transactions. For any business, this means the benefit of accelerating customer payments with a real-time, secure and cost-effective solution.

In addition to accepting credit and debit cards, gift cards and e-check payments, X-Charge provides store credit card and check information securely with end-to-end encryption. This eliminates fraud or errors with embedded security provisions. It should improve payment processing to 2 to 3 seconds using high speed internet and provides an improved reconciliation and data analysis with meaningful reporting tools. The AccountMate users will also be able to easily view outstanding invoices, select one or more invoices and efficiently process payments, process pre-authorizations against Sales Orders and capture pre-authorizations when Sales Orders are invoiced. Another especially beneficial feature is the way X-Charge for AccountMate processes refunds for credit memos.

X-Charge's integration with AccountMate's financial management solutions means that a business will have real-time access to key customer information without any security risks, costs and multiple points of failure associated with traditional payment processing systems.

"In keeping with our dedication to provide best-in-class services, AccountMate clients can now enjoy greater flexibility, ease-of-use, and more payment processing features when utilizing Accelerated Payments' payment solution developed specifically for AccountMate," said David Dierke, President & CEO of AccountMate Software. "Best of all, this integration is available at no extra cost to our customers once they subscribe to the payment processing system with X-Charge."
