Automated Level 3 Processing Integration by APS Payments

_____

Product Description

APS Payments offers flexible and integrated payment solutions for every business. APS Payments is a gateway and processor that is trusted by thousands of merchants daily to process payments and works diligently to get you the lowest credit card processing rates, reduce your risk, and provide the best solutions for your business. Batch processing, seamless integrations, and automation tools such as recurring billing increase your business' efficiency and improves cash flow. From multiple payment methods to multiple currencies, we provide trustworthy service for every business and every payment. What's more, we do this all at a negative cost to your company. APS Payments is seamlessly integrated with AccountMate as well as hundreds of other ERP, eCommerce, POS, and Mobile applications. If a prebuilt integration is not available for the business solutions you use, an API is available to develop a custom integration. When it comes to payments, don't settle for less than APS!

Company Profile

Headquartered in Mesa, Arizona, APS Payments was founded by a team of payment industry experts who realized the payment industry needed a big change. Our team mission is to create highly robust, yet easy to use solutions for our clients. With our connections to many different industries, we have become the endorsed merchant solutions provider for many restaurant, hospitality, and software companies throughout the United States. APS Payments is a Full-Service Merchant Services Provider (MSP). We serve thousands of small, medium, and large organizations.
