

NEW ACCU-DART FOR ACCOUNTMATE 9.4

The ACCU-DART team is committed to providing a comprehensive inventory management solution that works with the most current version of the ERP software. We are pleased to announce that ACCU-DART is compatible with the latest release of AccountMate – version 9.4.

ACCU-DART for AccountMate is also available for a variety of handheld devices, including Apple (iPod, iPad, and iPhone), Windows Mobile, and Android.

Users benefit from the same great ACCU-DART features: real-time validation and updating, as well as direct integration with AccountMate.

Our NEW ACCU-DART Mobile app offers many advantages:

- **Easy to Use:** ACCU-DART Mobile incorporates touch-screen selection that is already intuitive for many iPhone, Windows Mobile, and Android users. Our new navigation icons make it easy for users in any language to use our product.
- **Flexibility:** Communicate directly with the ERP solution from anywhere in the world where they have internet access - the devices use either wifi or cellular connections to integrate directly with the ERP system. Mobile devices also make it easy to run multiple apps in the warehouse, allowing users to have all their business applications at their fingertips.
